

## *Researchers*

The work of individual researchers in Hungary is supported by the residence permit issued for the purpose of research, which can also be applied for by researchers from non-EEA countries. A researcher is generally defined as a private individual with a doctorate who wishes to stay in Hungary **for the purpose of conducting scientific research** based on a hosting agreement concluded with an accredited research organization. The agreement with the research organization must be submitted for the application.

*With Kind Regards*

Valeria 😊
